DETAILED ACTION

Drawings

The corrected drawing was received on 7/20/05. This drawing is acceptable.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

1. In response to Applicant's remarks filed on 7/20/05, the rejection made in the last Office action on the Johnson reference is withdrawn.

2. The present invention is drawn to a mixer circuit utilizing an input stage, a mixer stage and a injecting a compensation current means recited in claims 1-7. None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: **"injecting a compensation current into the input stage so as to balance the differential current signals provided to the mixer stage"** in combination with "the input stage" and "the mixer stage" as recited in claims 1 and 7.

3. The prior art references submitted by the applicant on IDS form received on 4/16/04 was reviewed and considered. These references appear to be the best references with respect to the claimed invention and closely matched most of the references found during the examiner's searches. However, as noted above, the limitation **"injecting a compensation current into the input stage so as to balance the differential current signals provided to the mixer stage"** is not disclosed. Therefore, the claims are patentably distinct over all these prior art references of record.

Art Unit: 2816

The newly prior art reference cited on PTOL-892 is for interest and documentation purposes only. The Hatcher et al (U.S Patent No. 6,535,725) also appears to be the best reference with respect to the claimed invention. However, similarly as noted above, the limitation **"injecting a compensation current into the input stage so as to balance the differential current signals provided to the mixer stage"** is not disclosed. Therefore, the claims are also patentably distinct over this prior art reference of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
